

**OLD CHATHAM MONTHLY MEETING
CHILDREN PROTECTION TRAINING**

Role Play Scenarios

27 September 2015

Role Play 1

It is after meeting and several children are playing in and around adults as we stand and chat. You happen to notice one of the children has 2 bruises, one on the back of each calf. You also notice the child has a skinned knee that is healing. The child in question is kind of bossy with the others. When the children become a bit loud, an adult approaches them and quietly asks them to use inside voices. This child shouts, sticks out their tongue, and dances away.

Role Play 2

Two children are playing in the Yellow Room in the top of the wooden platform. You are the childcare person. There are two other children playing with the dollhouse. One child playing in the dollhouse uses one of the dolls to enact sitting on the toilet urinating. The two kind of giggle and make fart noises. A bit later, one of the children puts a male and female doll together in a bed. The child tells the other child that they are "sleeping together" and "touching peepes."

Role Play 3

You observe an adult and child who is not theirs walking thorough the parking lot.
